**GENERAL INFORMATION**

**Programme Nomenclature:**

National Innovation Diploma Programme in Computer Hardware Engineering Technology

**Goal:** To impart the necessary skills leading to the acquisition of skilled, enterprising and self-reliant personnel in **Computer Hardware Engineering Technology.**

**Objectives:** A product of National Innovation Diploma programme in Computer Hardware Engineering Technology should be able to:

1. Operate and maintain basic Operating Systems (DOS & Windows }
2. Understand the computer environment and acquire the skills needed to identify and optimize memory and computer configuration.
3. Start and manage computer-based businesses
4. Carry out routine (preventive) maintenance of Computer systems
5. Be able to assemble and install micro computers.
6. Partition and format disks and load files
7. Install window NT\200x in a multi-boot configuration.
6. Partition and format disks and load files
8. Install and uninstall software
9. Detect technical faults in a Micro Computer
10. Setup and troubleshoot basic Network in LAN

**Entry Qualifications**

*NID in Computer Hardware Engineering Technology (Draft)*

- i. S.S.C.E or its equivalent. Credit passes in Physics, Chemistry, Mathematics, English language and any other one from Metal works, Technical Drawing, Basic Electronics, Biology or Agricultural Science, Geography, and Further Mathematics.
- ii. The National Vocational Certificate {NVC} or National Technical Certificate {NTC} with credit passes in the trade modules and five academic subjects relevant to the programme and at least a pass in English language.

**NATIONAL CERTIFICATION**

Trainees who successfully complete all the courses/modules specified in the curriculum table and pass the national examinations in the trade will be awarded the following certification:

A National Innovation/Computer Diploma in Computer Hardware Engineering.

**Note:** This programme is expected to be in form of term/session-based training courses of not less than two years for full time and three for part-time.

**ACCREDITATION**

1. The programme shall be accredited by the National Board for Technical Education before the candidates can be awarded the National Innovation Diploma in Computer Hardware Engineering Technology (NID).
2. Details about the process of accrediting the programme for the award of the NID can be obtained from the *Executive Secretary, National Board for Technical Education, Plot "B", Bida Road, P.M.B. 2239, Kaduna , Nigeria*

**GUIDANCE NOTES FOR TEACHERS**

1. The new curriculum is drawn in unit courses and modules.
2. In designing the units, the principle of the modular system has been adopted, thus making each of the professional modules, if completed, enough to provide the student with operative skills, which can be used for employment purposes or otherwise.
3. Institutions may, as required, add courses to the minimum guide curriculum
4. The teaching of the theory and practical works should, as much as possible, be integrated. Practical exercises, especially those in professional courses and laboratory work should not be taught in isolation from the theory. For each course, there should be a balance of theory to practical works in the ratio of 30:70

## *NID in Computer Hardware Engineering Technology (Draft)*

### **CURRICULUM STRUCTURE**

The curriculum of all NID programme consist of main components. These are:

1. General studies/education
2. Foundation Courses
3. Professional Courses
4. Supervised Industrial/practical work scheme.

**THE THEORY:** This aspect consists of the general studies/education, the foundation and the professional courses which shall account for a minimum of 30% of the total contact hours for the programme.

**SUPERVISED INDUSTRIAL/ PRACTICAL WORK SCHEME** are courses, which give the student the theory and practical skills needed to practice the field of calling at the technical level. The component shall account for a minimum of 70% of the total contact hours for the programme.

### **NID Programme Duration**

1. Four semesters of two years full-Time.
2. Six semesters of three years- Part-Time
3. 8 hours per day or 40 hours per week
4. 18 weeks per semester(one week for registration and one for examination)

### **ASSESSMENT PROFILE:**

Practical Only

- |                |      |
|----------------|------|
| 1. Practical   | 100% |
| 2. Test        | 10%  |
| 3. Examination | 40%  |
| 4. Course work | 10%  |

*NID in Computer Hardware Engineering Technology (Draft)*

Theory Only

1. Examination 60%
2. Course work 20%
3. Test 20%

Theory and Practical

1. Examination 40%
2. Test 20%
3. Course work 20%
4. Practical 20%

FIRST YEAR  
FIRST SEMESTER

PROGRAMME : NID in Hard Ware Engineering

COURSE : Basic Electricity

CODE : CHT 101

DURATION: Hours/Week Theory : 2hrs Practical : 2hrs

UNIT : 4hrs

TOTAL CONTACT HRS: 84

GOAL : This is designed to provide the learner with working knowledge in basic electricity.

GENERAL OBJECTIVE: On completion of this course the learner should be to:

- 1.1 Understand Basic Electricity
- 1.2 Understand the uses of Multi Meter
- 1.3 Understand the uses of Megger Tester
- 1.4 Understand the uses of Basic Electricity kits

*NID in Computer Hardware Engineering Technology (Draft)*

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: Basic Electricity</b>		<b>COURSE CODE: CHT 101</b>		<b>CONTACT HOURS: 84</b>		
<b>GOAL: This course is designed to provide the learner with working knowledge basic electricity</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>GENERAL OBJECTIVE 1: UNDERSTAND BASIC ELECTRICITY</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
1-3	1.1 Define basic electricity 1.2 Outline the characteristics of basic electricity. 1.3 Define Ohm's law. 1.4 Describe the impact of basic electricity to: (a) current flow (b) voltage and (c) resistance 1.5 Define simple D.C circuits 1.6 State various types of energy and their inter-relationship	Explain basic electricity Explain the characteristics of basic electricity Describe Ohm's law Describe the impact of basic electricity to: (a) current flow (b) voltage and (c) resistance Explain simple D.C circuits	Chalkboard Magnetic Board, charts,	1.1 Identify various voltages as it applies to the above. Namely: (a) single, & (b) three phase.  1.3 Use basic electricity kits to setup simple circuits, to determine current flow, voltage, flow voltage, etc.	Demonstrate basic electricity concept  Explain various voltages e.g. single, three phases.	Chalkboard ,Magnetic Board, Charts.
4-6	1.7 Define the concept of magnetism and magnetic circuits 1.8 Define the concept of electromagnetism and electromagnetic induction 1.9 Define the concept of inductance, capacitance. Resistance and their applications. 1.10 State the fundamentals of A.C theory.	State various types of energy and their inter-relationship Explain the concept of magnetism and magnetic circuits Explain the concept of electromagnetism and		1.4 Identify the sources of current flow of electricity with voltage and resistance.	Demonstrate the use of simple electric circuits to determine current flow, voltage, etc.  Show the sources of current flow of electricity.	

*NID in Computer Hardware Engineering Technology (Draft)*

	1.11	Define Kirchoffs law and examine some circuits as it relates to Kirchoff's law.	electromagnetic induction Explain the concept of inductance, capacitance resistance and their applications. State the fundamentals of A.C theory. Define Krichoff's law and examine some circuits as it relates to Kirchoff's law.					
<b>GENERAL OBJECTIVE 2: UNDERSTAND THE USES OF MULTIMETER</b>								
7-8	2.1	Define a multi-meter.	Explain multi-meter.	Text Books, Diagrams, Charts, white Board and markers	2.1	Identify a multi-meter	Text Books, Diagrams, Charts, white Board and markers	
	2.2	State the uses of a multi-meter.	Explain the use of multi-meter.		2.2	Use a multi-meter to determine:		Demonstrate the use of a multi-meter. Identify a multi-meter Use a multi-meter to determine:
	2.3	State the colour codes.	Explain the colour codes.		of of	various types of diode various types of resistors		

*NID in Computer Hardware Engineering Technology (Draft)*

					various types of resistors	
<b>GENERAL OBJECTIVE 3: UNDERSTAND THE USES OF MEGGER TESTER</b>						
9-10	3.1 Define a megger-tester 3.2 State the uses of megger meter		Text Books, Diagrams, Charts, white Board and markers	Use transformers to determine how voltage is generated at the secondary windings.		
<b>GENERAL OBJECTIVE 4: UNDERSTAND THE USES OF BASIC ELECTRICITY KIT</b>						
<b>11-13</b>	<b>4.1 State the uses of basic electricity kit.</b> <b>4.2 Describe simple D.C circuits.</b> <b>4.3 Define R-C oscillator</b>	<b>Explain basic electricity kits.</b> <b>Explain simple D.C circuits.</b> <b>Explain R-C oscillator</b>	Text Books, Diagrams, Charts, white Board and markers	Use basic electricity kits to determine the impedance [z] of capacitive, inductive and resistive loads of simple circuits.  Use basic electricity kits to setup simple Network, to determine the current flows applying kirchoff's law.	Demonstrate using basic electricity kits to determine the impedance [z] of capacitive, inductive and resistive loads of simple circuits. Demonstrate using basic electricity kits, setup simple Network, to determine the current flows applying kirchoff's law.	Text Books, Diagrams, Charts, white Board and markers
<b>14</b>	<b>REVISION</b>					

*NID in Computer Hardware Engineering Technology (Draft)*

PROGRAMME : NID in Hard Ware Engineering

COURSE : Introduction to Operating System.

CODE : CHT 111

DURATION: Hours/Week Theory : 2hrs Practical : 4hrs

UNIT : 6hrs

TOTAL CONTACT HRS: 84

GOAL : This is designed to provide the learner with working knowledge of Operating System.

GENERAL OBJECTIVE: On completion of this course the learner should be able to:

- 1.1 Understand Operating System
- 1.2 Understand UNIX Operating System
- 1.3 Understand the Linux Operating System
- 1.4 Understand the Windows Operating System

*NID in Computer Hardware Engineering Technology (Draft)*

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: INTRODUCTION TO OPERATING SYSTEM</b>			<b>COURSE CODE: CHT 111</b>		<b>CONTACT HOURS: 84</b>	
<b>GOAL: This course is designed to provide the learner with working knowledge Operating System</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>GENERAL OBJECTIVE: UNDERSTAND THE CONCEPTS AND ENGINEERING OF SCANNERS.</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
<b>GENERAL OBJECTIVE 1: UNDERSTAND OPERATING SYSTEM</b>						
1-3	1.1 Define Operating System (O/S)  1.2 List the functions of O/S  1.3 Describe sequential processes  1.4 Define concurrent processes  1.5 Describe processor management	Explain an Operating System (O/S)  Give examples of O/S  Explain the features of O/S  Explain sequential Processes  Explain concurrent processes  Explain processor management	Chalkboard, chart magnetic board			
<b>GENERAL OBJECTIVE 2: UNDERSTAND UNIX OPERATING SYSTEM</b>

PROGRAMME : NID in Hard Ware Engineering

COURSE : System Architecture.

CODE : CHT 122

DURATION: Hours/Week Theory : 2hrs Practical : 4hrs

UNIT : 6hrs

TOTAL CONTACT HRS: 84

GOAL : This course intends to provide the learner with the structural and functional features of the computer system and its components

GENERAL OBJECTIVE: On completion of this course the learner should be able to:

- 1. Understand Numbering System.**
- 2. Know the Internal Structure of Computer Processing Unit.**
- 3. Understand the basic principles of Microelectronics and Optoelectronics.**
- 4. Understand the concept and development of Simple programs for a Microprocessor**

*NID in Computer Hardware Engineering Technology (Draft)*

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: SYSTEM ARCHITECTURE I</b>		<b>COURSE CODE: CHT 122</b>		<b>CONTACT HOURS: 84</b>		
<b>GOAL: This course intends to provide the learner with the Structural and Functional Features of the Computer System and Components.</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>GENERAL OBJECTIVE: UNDERSTAND NUMBERING SYSTEM.</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
1-4	1.1: Define Number System. 1.2: Describe the various types of number systems. 1.3: Define Binary System. 1.4: Solve problems on Binary System [Addition, Subtraction, Multiplication, and subtraction]. 1.5: Convert numbers from other base to binary. 1.6: Convert numbers from binary to other base.	-Explain Number System. -Explain the various types of number systems. -Explain Binary System. -Solve problems on Binary System [Addition, Subtraction, Multiplication, and Subtraction]. Convert numbers from other base to binary. Convert numbers from binary to				

*NID in Computer Hardware Engineering Technology (Draft)*

	<p>1.7: Describe Binary Comparators.</p> <p>1.8: Describe the concept of Error Detection.</p>	<p>other base. Convert alphabets / words to binary. Explain Binary Comparators. Describe the concept of Error Detection.</p>				
<b>GENERAL OBJECTIVE: KNOW THE INTERNAL STRUCTURE OF COMPUTER PROCESSING UNIT.</b>						
5-7	<p>2.1: Define the Central Processing Unit.</p> <p>2.2: Outline the functions of the C P U components [Motherboard, Processor, RAM Memory, Disk Drives, Power Pack, Cables, Slots: Peripheral Component Interconnect [PCI], International Standard Architecture [ISA].</p>	<p>: Explain the Central Processing Unit. Explain functions of components of the C. P. U. [Motherboard, Processor, RAM Memory, Disk Drives, Power Pack, Cables, Slots: Peripheral Component Interconnect [PCI], International Standard Architecture [ISA].</p>		<p>2.7: Identify components of the Central Processing Unit.</p> <p>2.8: Set jumpers to tune accurately.</p>	<p>Demonstrate each activity of the Specific Learning Objectives.</p>	

*NID in Computer Hardware Engineering Technology (Draft)*

	<p>2.3: Describe the concept of Jumpers and Caps.</p> <p>2.4: Describe Memory Circuits.</p> <p>2.5: Identify the types of signals within the C. P. U. [Electrical and interface].</p> <p>2.6: Describe the flow of signals with the C. P. U.</p>	<p>Explain the concept of Jumpers and Caps.</p> <p>Explain Memory Circuits.</p> <p>Explain the types of signals within the C. P. U. [Electrical and interface].</p> <p>Explain the flow of signals with the C. P. U.</p>				
<b>GENERAL OBJECTIVE: UNDERSTAND THE BASIC PRINCIPLES OF MICROELECTRONICS.</b>						
8-11	<p>3.1: Describe Microelectronics.</p> <p>3.2: Describe Integrated Circuit.</p> <p>3.3: Describe the concept of Wafer.</p> <p>3.4: State the Concept of Tantalum.</p> <p>3.5: Identify types of Integrated Circuits.</p> <p>3.6: Describe the concept of 8/16/32 bits Computer architecture.</p>	<p>Introduce with clear and detailed explanations each of the concepts in the specific learning objective.</p>		<p>3.6: Demonstrate the Concept of Microelectronics.</p> <p>3.7: Demonstrate the concept of Optoelectronics.</p>	<p>Demonstrate each activity of the Specific Learning Objectives.</p>	<p>Electronic Boards, Integrated Circuits, Computer motherboards [all mentioned categories], multi-meter.</p>

*NID in Computer Hardware Engineering Technology (Draft)*

**GENERAL OBJECTIVE: UNDERSTAND THE CONCEPT AND DEVELOPMENT OF SIMPLE PROGRAMS FOR A MICROPROCESSOR.**

*NID in Computer Hardware Engineering Technology (Draft)*

12-13	<p>4.1: Define Microprocessor.</p> <p>4.2: List examples of Microprocessors [386, 486, Pentium I to IV].</p> <p>4.1: Define Program.</p> <p>4.2 Identify types of programming languages.</p> <p>4.3: Define Language Translator.</p> <p>4.4: Describe the various types translator [Assembler and Compiler].</p> <p>4.5: Outline the steps involved in developing a program.</p> <p>4.6 Describe Internal Working of the Microprocessor as it relates to:</p> <ul style="list-style-type: none"> <li>a. Fetching Instructions.</li> <li>b. Moving Instructions between registers.</li> </ul>	<p>Introduce with clear and detailed explanations each of the concepts in the specific learning objective.</p>		<p>4.6: Identify a Microprocessor.</p> <p>4.7: Identify various types of microprocessor.</p> <p>4.8: Install and Uninstall Microprocessors on the Motherboard.</p> <p>4.9 Develop a Simple Program for a microprocessor.</p>	<p>Demonstrate each activity of the Specific Learning Objectives.</p>	<p>Microprocessor Teaching Aid.</p>

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: PC ASSEMBLING AND UPGRADING.</b>		<b>COURSE CODE: CHT 211</b>		<b>CONTACT HOURS: 84</b>		
<b>GOAL: This course is designed to provide the learner with working knowledge of Personal Computer Assembling, Installation and Upgrading.</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>1 GENERAL OBJECTIVE: KNOW THE COMPATIBILITY VARIANCE AMONG COMPUTER COMPONENTS.</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
1-3	1.1: Define Motherboard. 1.2: Define RAM memory. 1.3: Describe SIMMs. 1.4: Describe DIMMs. 1.5: Define Processor. 1.6: Outline types of Processors. 1.7 Describe the appropriate disk Jumper settings suitable for various motherboards [Master,	Introduce with clear and detailed explanations each of the concepts in the specific learning objective.	Text books, White Board, Marker. computer accessories	1.8: Identify the various available motherboards in the computer market. 1.9: Identify the various RAM memory [SIMMs, DIMMs]. 1.10: Identify various types of SIMMs as it relates to manufacturers. 1.11: Identify various types of DIMMs as it relates to manufactures. 1.12: Identify various	Demonstrate each activity of the Specific Learning Objectives.	Set of screw drivers, scraps of CPU, Mother boards, Hard drives, memory, RAM [SIMMs and DIMMs], CD ROM Drives, floppy disk drives.

*NID in Computer Hardware Engineering Technology (Draft)*

	Cable Select, Slave]			types of Processors.		
<b>2 GENERAL OBJECTIVE: KNOW THE COUPLING / ASSEMBLING PROCEDURES OF COMPUTER PROCESSING UNIT.</b>						
4-5	2.1: Define Computer Casings. 2.2: Define Clock speed. 2.3: Define IDE and FDD cables. 2.4 Explain and Identify a corresponding casing to suit the motherboard	Explain Computer Casings Explain Clock speed.  Explain IDE and FDD cables.		2.4: Select an appropriate Motherboard, and know the clock speed.  2.5 Place motherboard correctly inside the casing and screw. 2.6 Mount Processor, Memory and other Onboard components appropriately. 2.7 Fix disks to the casing and fasten. 2.8 Connect IDE, FDD cables accordingly. 2.9 Set disks' jumper settings appropriately. 2.10 Connect Power Cables within the C.P.U.	Demonstrate each activity of the Specific Learning Objectives.	Computer Casings, Motherboards, RAM memory, Microprocessor, Disk Drives, Adapters / Cards.
<b>3 GENERAL OBJECTIVE: UNDERSTAND THE HARDWARE CONFIGURATIONS INVOLVED IN THE ASSEMBLING OF THE COMPUTER PROCESSING UNIT.</b>						
6-7				3.1: Set jumpers onboard appropriately. 3.2: Set disks' jumpers	Demonstrate each activity of the Specific Learning Objectives.	Motherboard, Disks, Jumper caps, Cards.

*NID in Computer Hardware Engineering Technology (Draft)*

				<p>appropriately.</p> <p>3.3: Place cards accurately on the respective slots [ISA to ISA; PCI to PCI].</p> <p>3.4: Connect Switch cables correctly.</p> <p>3.5: Connect LED cable correctly,</p> <p>3.6: Connect Inbuilt Speaker cable correctly.</p> <p>3.7: Connect Turbo cable correctly.</p> <p>3.8: Connect Reset cable correctly.</p>		
<b>4 GENERAL OBJECTIVE: UNDERSTAND THE SOFTWARE CONFIGURATION INVOLVED IN THE ASSEMBLING OF THE PROCESSING UNIT.</b>						
8-9	4.1: Describe BIOS / CMOS setup.	Introduce with clear and detailed explanations the concept in the specific learning objective.		<p>4.2: Connect the entire computer system to.</p> <p>4.3: Power the Computer System.</p> <p>4.4: Enter the BIOS / CMOS Setup environment pressing the appropriate key[s] at the expected time.</p> <p>4.5: Explore through the environment.</p> <p>4.6: Set the necessary components to</p>	Demonstrate each activity of the Specific Learning Objectives.	Working Personal Computer, Power and Signal Cables, Electricity.

*NID in Computer Hardware Engineering Technology (Draft)*

				correspond with hardware configuration [Primary Master, Secondary Masters, Primary slave, Secondary Slave, Floppy Disk active or deactive, cache, processor clock speed].		
<b>5 GENERAL OBJECTIVE: KNOW THE ACTIVITES INVOLVED IN UPGRADING A COMPUTER.</b>						
10-11				5.1: Identify the motherboard of the system to be upgraded. 5.2: Identify the processor and its clock speed on the motherboard. 5.3: Identify the RAM memory and size on the motherboard. 5.4: identify the Hard disk drive of the system. 5.5: Identify the CD ROM drive speed of the system. 5.6: Remove any of the five [5] above to be upgraded, and Replace with a	Demonstrate each activity of the Specific Learning Objectives.	Working Computer System, Motherboard, Processor, RAM memory, Hard disk drive, CD ROM drive, all with higher capacity than the one in the system.

*NID in Computer Hardware Engineering Technology (Draft)*

				<p>higher category of the same component.</p> <p>5.7: Set the BIOS / CMOS Setup configuration to suit the new components.</p>		
<b>6 GENERAL OBJECTIVE: INSTALL A PERSONAL COMPUTER FOR USE.</b>						
12-13				<p>6.1: Identify the various computer components.</p> <p>6.2: Connect all other units correctly to the Processing Unit.</p> <p>6.3: Connect the Power Cables to the C. P. U. and Monitor.</p> <p>6.4: Identify the amount of voltage required for each unit.</p> <p>6.5: Set power to suit the Computer System and verse versa.</p>	<p>Demonstrate each activity of the Specific Learning Objectives.</p>	<p>Central Processing Unit, Monitor, Keyboard, Mouse, Power Cables and electricity.</p>

1-4	1.1: Describe Scanner  1.2 Explain the level of accuracy			1.1 Carryout the operation of a scanner [turning on/off, connecting the interface cable, using available functions like Pre-scan, Scan, Print,]. 1.2: Identify scanner problem [hardware or software]. 1.3: Troubleshoot the Scanner. 1.4: Effect repairs on the Scanner, using the appropriate tool[s] or equipment.	Demonstrate each activity of the Specific Learning Objectives.	Blowers, IC extractor, set of screw drivers, soldering iron, lead sucker, multi-meter, micro computers, Installation, disks to include Anti virus, scraps of CPU, Mother board, Hard drive, memory, RAM, CD ROM Drive, floppy disk drive.

*NID in Computer Hardware Engineering Technology (Draft)*

<b>GENERAL OBJECTIVE: UNDERSTAND THE CONCEPTS AND ENGINEERING OF POWER PACKS.</b>						
5-7				<p>2.1: Describe the Computer Power Pack.</p> <p>2.2: Identify the Power Pack.</p> <p>2.3: Troubleshoot the Power Pack. [fuse, switch, wire, resistor, capacitor, transistor], using multi-meter or appropriate instrument.</p> <p>2.4: Effect Repair.</p>	Demonstrate each activity of the Specific Learning Objectives.	Blowers, IC extractor, set of screw drivers, soldering iron, lead sucker, multi-meter, micro computers, scraps of CPU.
<b>GENERAL OBJECTIVE: UNDERSTAND THE OPTIMAL USAGE OF COMPUTER SYSTEM AND COMPUTER ACCESSORIES.</b>						
8-10				<p>3.1: Connect the Computer System and accessories correctly.</p> <p>3.2: Power the System to work.</p> <p>3.3: Perform advance maintenance tasks on the computer system [run computer defragmenter, create backup of files, connect to internet and download necessary utility tools and</p>	Demonstrate each activity of the Specific Learning Objectives.	Micro computers, disks drive cleaner, Hard drive, memory, RAM, CD ROM Drive, floppy disk drive. Internet Connectivity.

*NID in Computer Hardware Engineering Technology (Draft)*

				program updates, clean drives using appropriate disk cleaners].		
<b>GENERAL OBJECTIVE: KNOW THE CONCEPTS AND ENGINEERING OF OTHER COMPUTER ACCESSORIES.</b>						
11-13				4.1: Identify other Computer Accessories. 4.2: Identify their problem. 4.3 Troubleshoot the accessories. 4.4: Effect Repairs.	Supervise the learner to achieve the Specific Learning Objectives.	Blowers, IC extractor, set of screw drivers, soldering iron, lead sucker, multi-meter, micro computers, Installation, disks to include Anti virus, scraps of CPU, Mother board, Hard drive, memory, RAM, CD ROM Drive, floppy disk drive, First Aid box.
14	REVISION					

*NID in Computer Hardware Engineering Technology (Draft)*

**GOAL : This course is designed to provide the learner with working knowledge of Basic Networking**

GENERAL OBJECTIVE: On completion of this course the learner should be able to:

- 1.1 Understand data communication and the various equipment/components**
- 1.2 Understand modulation and de-modulation**
- 1.3 Understand multiplexing and de-multiplexing**

**GOAL : This course is designed to provide the learner with working knowledge of Basic Networking**

GENERAL OBJECTIVE: On completion of this course the learner should be able to:

- 1. UNDERSTAND THE CONCEPTS AND ENGINEERING OF SCANNERS
- 2. Understand data communication and the various equipment/components
- 3. Understand modulation and de-modulation

*NID in Computer Hardware Engineering Technology (Draft)*

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: BASIC NETWORKING</b>		<b>COURSE CODE: CHT 232</b>			<b>CONTACT HOURS: 84</b>	
<b>GOAL: This course is designed to provide the learner with working knowledge of Basic Networking</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>GENERAL OBJECTIVE: UNDERSTAND THE CONCEPTS AND ENGINEERING OF SCANNERS.</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHERS ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
<b>GENERAL OBJECTIVE: 1.1 Understand data communication and the various equipment/components</b>						
1-7	<p>1.1 Define data communication</p> <p>1.2 List the various equipment used for data communication</p> <p>1.3 Describe multiplexing and de-multiplexing</p>	<p>-Explain data communication.</p> <p>-Explain different equipment and components used in data communication</p> <p>Explain multiplexing and de-multiplexing</p> <p>1.1 Explain common technologies available for establishing Internet connectivity and their characteristics</p> <p>(a) Technologies</p>		<p>Identify data communication components.</p> <p>identify the common types of network cables, their characteristics and connectors</p> <p>(a) Cable types include: Coaxial, UTP, CAT 3, CAT 5/e, CAT 6, STP, fiber</p> <p>(b) Connector types include: BNC, RJ-45, AUI, ST/SC, IDC/UDC.</p>	Supervise learners in achieving the specified objectives	<p>2 or more personal computers, MODEMs of various types, coaxial cable, R-J45, Clips/trunking</p> <p>Explain basic networking concepts including how a networks Concepts like Installing and configuring network cards, Addressing, Bandwidth.</p> <p>(a) Status indicators, protocols, TCP/IP, IPX/SPX, Apple talk,</p>

*NID in Computer Hardware Engineering Technology (Draft)*

		<p>include: LAN, DSL, Cable, ISDN, Dial-up, Satellite, Wireless</p> <p>Characteristics include: Definition, speed and connections</p>				<p>Full-duplex, half-duplex (b) Cabling- twisted pair, coaxial, fiber optics, RS-232, Networking models, peer-to-peer, client/server, infrared fibre optic cables, connectors, Hub/Switches, Routers.</p>
<b>GENERAL OBJECTIVE: Understand modulation and de-modulation</b>						
8-13	<p>3.1 Describe modulation and de-modulation 3.2 identify various tools used.</p>	<p>Explain modulation and de-modulation Explain the various tools used</p>

PROGRAMME : NID in Hard Ware Engineering

COURSE Consumer Electronics

CODE : CHT 232

DURATION: Hours/Week Theory: 2hrs Practical: 4hrs

UNIT : 6hrs

TOTAL CONTACT HRS: 84

GOAL : This course is designed to provide the learner with the Practical knowledge of consumer Electronics

GENERAL OBJECTIVE: On completion of this course the learner should be able to:

- 1.1 Understand the concept of consumer electronics
- 1.2 Understand the building blocks and modules of television, radio receivers etc
- 1.3 Understand the concept of maintenance culture in computer and electronics

*NID in Computer Hardware Engineering Technology (Draft)*

Second Year  
Second Semester

<b>PROGRAMME: NATIONAL INNOVATION DIPLOMA IN COMPUTER HARDWARE ENGINEERING TECHNOLOGY (NID)</b>						
<b>COURSE: CONSUMER ELECTRONICS</b>		<b>COURSE CODE: CHT232</b>			<b>CONTACT HOURS: 84</b>	
<b>GOAL: This course is designed to provide the learner with the Practical knowledge of consumer Electronics</b>						
<b>COURSE SPECIFICATION: Theoretical Contents:</b>				<b>Practical Contents</b>		
<b>1.4</b>						
<b>GENERAL OBJECTIVE: UNDERSTAND THE CONCEPTS of consumer electronics</b>						
WEEK	SPECIFIC LEARNING OBJECTIVE	TEACHERS ACTIVITIES	LEARNING RESOURCES	SPECIFIC LEARNING OBJECTIVE	TEACHERS ACTIVITIES	LEARNING RESOURCES
1-5	1.1 Describe the concept in television, radio, computer monitors(VDU), VCD players, multi-media  1.2 Identify tools used in electronic repairs such as: Tv, VCD players, multi-media projectors etc.	Explain the concept in television, radio, computer monitors(VDU), VCD players, multi-media  1.2 Mention tools used in electronic repairs such as: Tv, VCD players, multi-media projectors etc.		1.2 Repair television, radio, computer monitors(VDU), VCD players, multi-media etc	Demonstrate how to repair VDU, TELEVISION, PRINTERS, c.p.u power packs and general maintenance etc	Blowers, IC extractor, set of screw drivers, soldering iron, lead sucker, multi-meter, micro computers, Installation, disks to include Anti virus, scraps of CPU, Mother board, Hard drive, memory, RAM, CD ROM Drive, floppy disk drive, First Aid box.
<b>GENERAL OBJECTIVE: Understand the building blocks and modules of television, radio receivers etc</b>						

*NID in Computer Hardware Engineering Technology (Draft)*

6-9	2.1 Describe building blocks of a TV and RADIO 2.2 Identify various building blocks in electronics	Explain building blocks of a TV and RADIO mention various building blocks in electronics				
<b>GENERAL OBJECTIVE: Understand the concept of repairs and maintenance in electronics/computer</b>						
10-13	3.1 Describe the concept of repairs and maintenance in electronics.  3.2 Define the concept of repairs of C.P.U. power supply packs	Explain the concept of repairs and maintenance in electronics.  Explain the concept of repairs of C.P.U. power supply packs		Demonstrate the concept of repairs and maintenance in electronics.  Identify the concept of repairs of C.P.U. power supply packs	Teacher learners how to repair electronics gargets such computers, vcd, radios television etc

## **COMPUTER HARDWARE ENGINEERING TECHNOLOGY**

### **List of Equipment for NID Laboratory (Minimum Requirement)**

<u>HARDWARE</u>	<u>NOS.</u>
1. PCs Computer Systems (Pentium 4 with 1.6GHz, 256MB RAM; 40GB HDD Internet ready)	10
2. Hp LaserJet Model	1
3. DeskJet Model	1
4. Summa graphic digitizer	1
5. Hp scan jet	1
6. LCD scan jet	1
7. Magic Board	1
8. Digital Camera	1
9. Various Networking Materials (HUB, Coaxial Cable RJ 45, Modem...)	
10. Oscilloscope 5-10MHz, 20MHz	1 each
11. Soldering Iron	20pcs
12. Digital Multi Meter	20pcs
13. Analogue Multi Meter	20pcs
14. Base Board	20pcs
